

## Data Residency Confirmation

### Data Residency Options

Yes, Be Data Solutions Limited provides options to ensure that your data can be processed exclusively within the UK and/or the European Economic Area (EEA). We are dedicated to meeting your data residency requirements and ensuring compliance with relevant data protection regulations.

### Primary Data Centre Location

- **Location:** London, UK
- **Details:** Our primary data centre is located in London, UK, ensuring that data is stored and processed within the UK. This facility is equipped with comprehensive security measures and adheres to UK data protection standards.

### Backup Data Centre Location

- **Location:** Dhaka, Bangladesh
- **Details:** Our backup data centre is situated in Dhaka, Bangladesh. This facility is designed to provide redundancy and disaster recovery solutions, ensuring that your data is securely backed up. Although the backup data centre is outside the EEA, we implement strict security protocols to protect data integrity and comply with data protection regulations.

By utilizing these locations, we offer a balance between robust data security and compliance with your data residency preferences.

If you have any specific data residency concerns or additional requirements, please contact us.
